Major General E. B. LeBailly Director SAF-OI Room 4D922 The Pentagon Washington 25, D.C.

Dear Ben:

Two friends of mine spotted an unusual occurrence while doing some astronomy the other evening.

I thought if the Air Force is still keeping an active check on UFO's, you might pass it on to whoever handles that sort of thing.

Please let me know of any comment you may receive.

transit de 11.01, en 7 MAY 1964. DATE 21:00 N.Y. TIME appeared theating enough for TIME X.Y, (Parthouse) stutioning period at zenith. Then continue dre N. & disappeared in briga hoze Viewed for most of trie in 3½ " QUESTAR at 180 and 1 160 - appeared as pure star mage. In sight about 15 min, sewith passage about 09.00h. Clear night. Ecto 1 was showed in

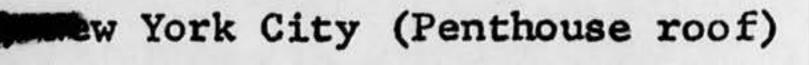

Date:

17 May 1964

Time:

2100 New York time

Place:

Witnesses:

Bright, white star, no variation, rose in South and moved fairly rapidly towards Zenith. First assumed to be ECHO. However, it remained stationary at Zenith for several minutes. Then continued due North and disappeared in horizon haze. Viewed for most of time in 3½" QUESTAR at \$\frac{1}{80}\$ and \$\frac{1}{60}\$- appeared as pure star image. In sight about 15 minutes, Zenith passage about 09.00 H. Clear night.

ECHO 1 was observed in transit at 11.01, and appeared identical except for stationary period at Zenith.

In its Northward motion, the object was observed to pass between and Y Ursa Major.

AT GO. 11 AN MAY . 17 NORTH OF CITY. 68 DEGREES ABOVE HORIZON MOUTHG SE

Dear Mr

General LeBailly has asked me to reply to
your letter of June 8, 1964, in which you inclosed
a report of an unusual aerial object which was
observed by Messrs...
at approximately 9 p.m. on May 17th...

Echo I was responsible for this observation as well as the later sighting at approximately II p.m. The satellite made two passes over New York City on the evening of the 17th, one at 9:01 p.m. borth of the city, 60° above the horizon moving northeast, and the second at 11:03 p.m., north of the city, 71° above the horizon moving southeast. It probably gave the appearance of being stationary at one point since it was at the zenith and viewing it from the ground made it appear to slow down or stop altogether until it began its swing downward from its arc.

Sincerely,

MASTON M. JACKS
Major, USAF
Public Information Division

Republic Aviation Corporation 1000 16th Street N.W. Washington 6, D.C.

June 12, 1964

Dear Mr.

In my letter of June 11th to Mr. the time computed for the passage of Echo I was completely in error, as he pointed out in his telephone conversation of this afternoon. I regret our misevaluation of your report and we will try to rectify our previous calculations as soon as we possibly can.

In this connection, would you and Mr. Clarke mind filling out the attached Forms 164 which is our USAF Technical Information sheet. With these completed and in hand, our project office at Wright-Patterson Air Force Base will attempt to find a cause for this unusual phenomena.

I am also inclosing two envelopes for your convenience in replying. As soon as we have completed our analysis, we will advise you further.

Sincerely,

MASTON M. JACKS

Major USAF
